## Hacking the M Code to Number a Grouped Row

- Use the UI to generate M code
- Be inquisitive about the code
- Copy the code generated by the UI and re-use it elsewhere
- Finally, pivot the results

| Name    | Favourite Fruit |
|---------|-----------------|
| Matt    | Strawberries    |
| Matt    | Blueberries     |
| Tracey  | Apples          |
| Tracey  | Bananas         |
| Tracey  | Apricots        |
| Patrick | Bananas         |
| Patrick | Oranges         |
| Greg    | Watermelon      |
| Lisa    | Peaches         |

  

| Name    | Preference 1 | Preference 2 | Preference 3 |
|---------|--------------|--------------|--------------|
| Greg    | Watermelon   |              |              |
| Lisa    | Peaches      |              |              |
| Matt    | Strawberries | Blueberries  |              |
| Patrick | Bananas      | Oranges      |              |
| Tracey  | Apples       | Bananas      | Apricots     |
